

The Consciousness and Healing Initiative: 2024 End of Year Report

Going Further Together

CHI synergizes stakeholders for systems change in healing, to massively expand healing worldwide.

Our collaborative is composed of highly respected, rigorous scientists, leading healing practitioners, educators who are well-placed across universities and institutions in the US and abroad, as well as seasoned practitioners and innovators.

By uniting streams of wisdom to foster biofield healing education and community, and by forwarding rigorous research in biofield science and healing, CHI's efforts allow for individuals, clinics, hospitals and communities to be fully engaged in their healing power, to heal ourselves and others.

The Energy that Heals Documentary

A groundbreaking film to bring the biofield to the mainstream and fully expand human healing capacity.

Our proposed documentary, *The Energy that Heals*, will bridge the gap between society's limited healing education and empowerment through an inspiring, **all-star, evidence-based, indigenous wisdom and patient-informed film**. *The Energy that Heals* will not only open the mind - it will also unleash the power of the spirit so that humanity can truly realize the potential we have to create our own flourishing individually, in community, and with the Earth.
